

How to Identify Your Facebook Donors

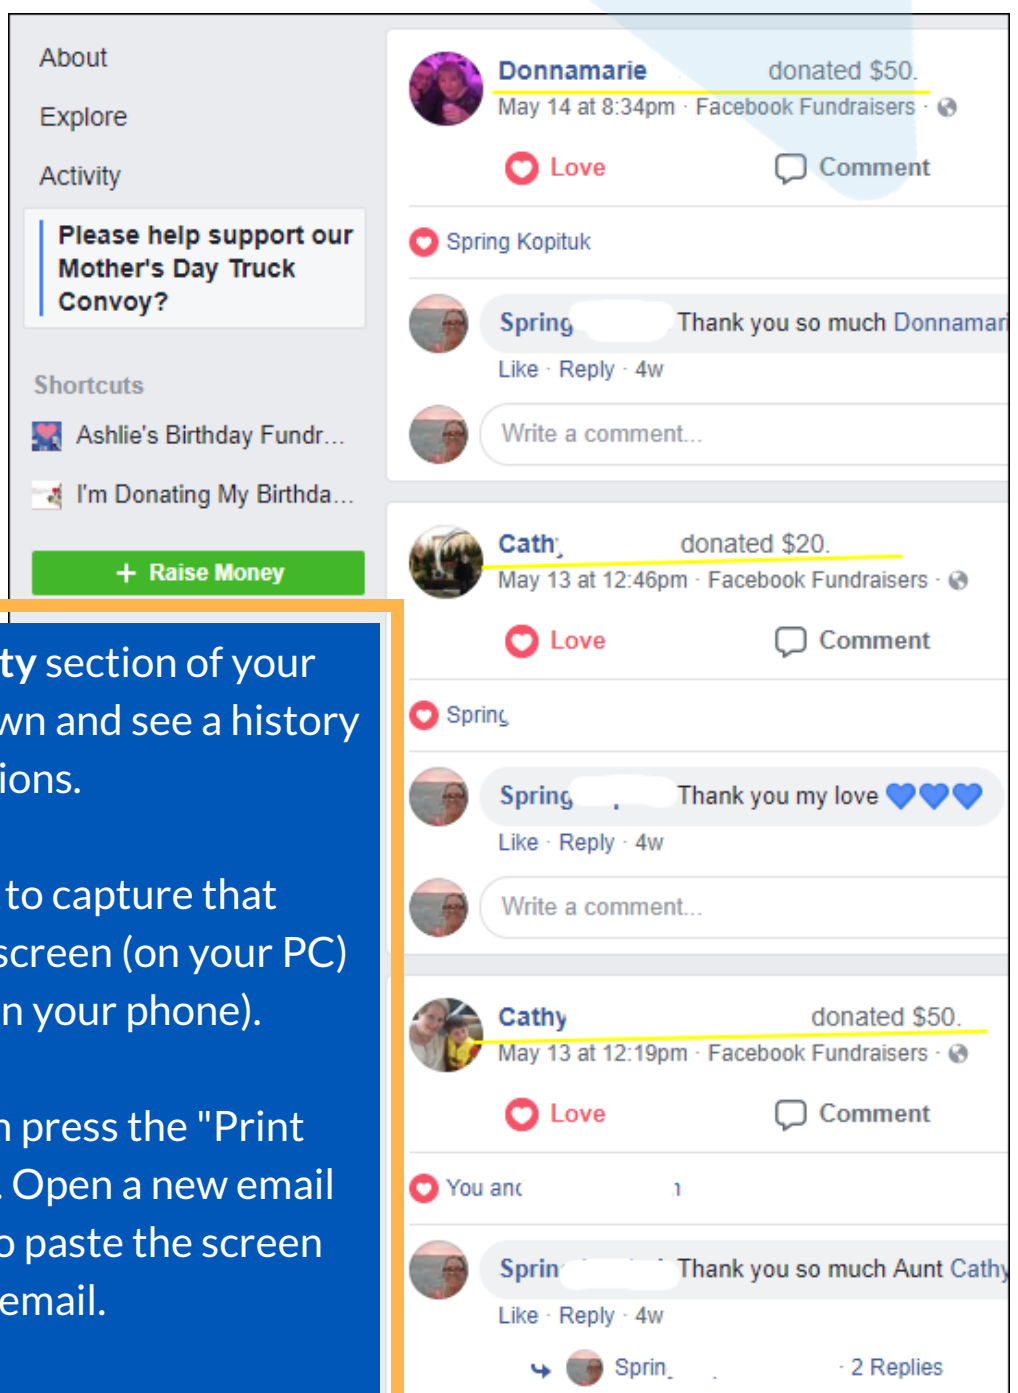

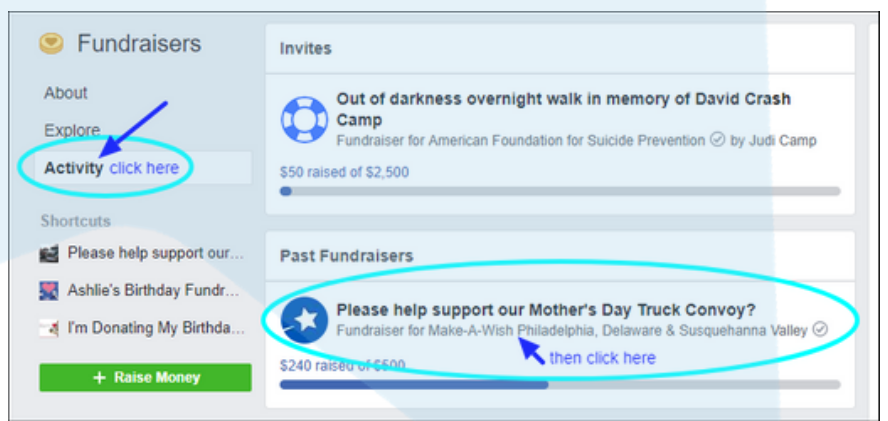

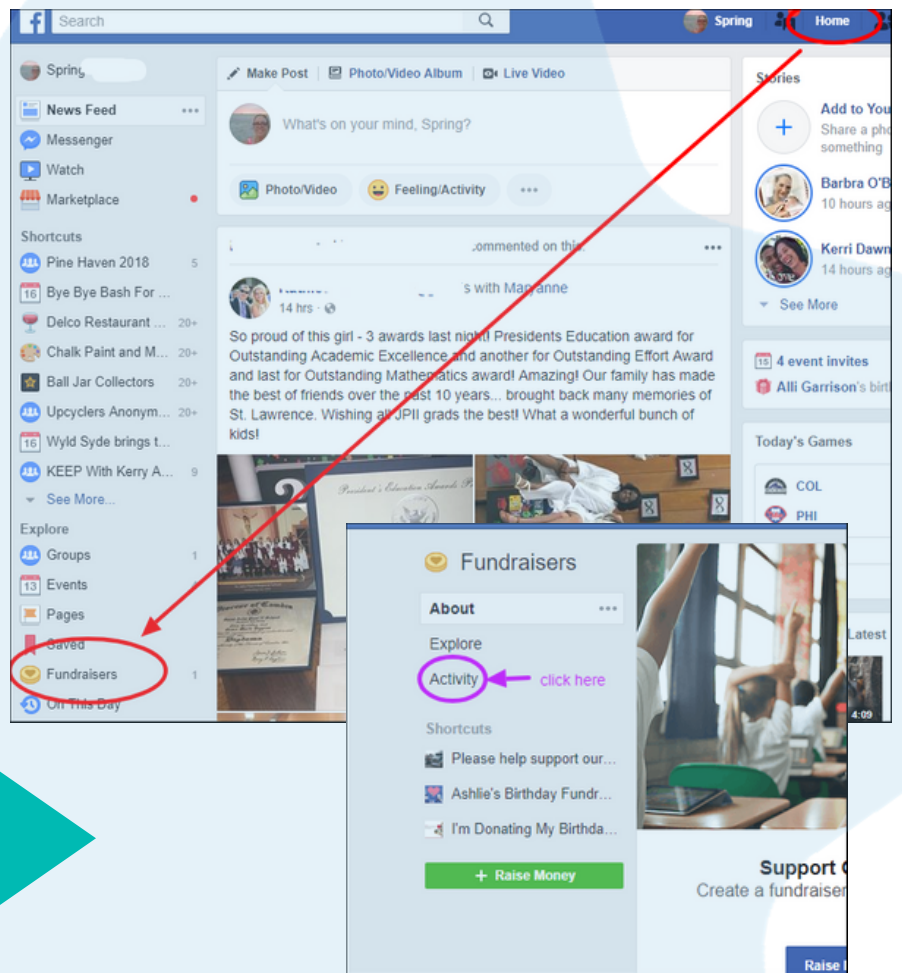

Facebook fundraisers are a fantastic and convenient way to support Make-A-Wish. Here's how you can access your fundraising history and activity!

Note: This is how you can retrieve fundraiser information from Facebook.com via your computer. If you are on a mobile device and using the Facebook app, you just need to find your settings (usually in the upper right). From there, the process is similar.

1 Go to Facebook. From **Home**, look at the left hand column. You should see Fundraisers about $\frac{3}{4}$ of the way down.

2 If you do see **Fundraisers**, click it to get to the details, then click **Activity**.

3 Once you click **Activity**, your past and present fundraisers appear on the right. Just click the name of the fundraiser you created to get more details.

Once you are in the **Activity** section of your fundraiser, you can scroll down and see a history of your donations.

Right now, the only way to capture that information is to do a print-screen (on your PC) or take a screen shot (on your phone).

On a PC, look for and then press the "Print Screen" or "PrtScn" button. Open a new email and then simply CTRL+V to paste the screen shot into your email.

On your phone, simply take as many screen shots as necessary and attach the image(s) to your email or document.
